

## DMC Floss Color Chart

These page give you a color picture of the DMC floss colors arranged in color families (not by color number). The picture comes from DMC thread color book. Although not exact, the colors are fairly accurate. Remember that the colors you will see depend greatly on the quality and calibration of your computer screen or printer. The picture is made up of high resolution scans that have been converted in PhotoShop to a lower resolution .jpg file.

This color chart is handy if you want to change colors in a chart. For example, say you want to change part of a design from red to blue. The red in the design has shadowing (red with 2 shades of darker red to create the shadow or texture). An easy way to convert to blues would be to pick all the shades of blue from the same family.

To find a particular color number in the color chart use the color table below. The table gives the column to find the color number.

ECRU	17	225	3	433	16	606	13	747	7	834	11	943	8	3046	12	3752	6	3826	14
